

**EU-Roller Impact and Picking Idler** is a superior impact conveyor roller design, manufactured with 4-6 mm marine grade aluminum tubing, Elastone impact absorbing rings and assembled around the patented bearing cap assembly.

## Impact and Picking-Idler Rollers:

- ⊗ Flexible
- ⊗ High wear resistance
- ⊗ Corrosion resistant roller body
- ⊗ Longer bearing life
- ⊗ Lower roller mass
- ⊗ Shock resistant bearing cover
- ⊗ Longer ring life
- ⊗ Robust design

### Available sizes:

114, 127 and 133 mm diameter 20 & 25 series

160 and 180 mm diameter, 25 & 30 series

Standard, Anti-Seize, Side and Heavy Duty series

Length of rollers to suit the customer: 180 - 2050 mm  
(2300 mm is under development)

**Shaft end to be formed to customer requirements**

**Small quantity of rollers are also available**
